	ICTIONAL DETERMINATION npleted: Desktop determination Site visit(s)		Date: 8-24-2004 Date(s):	
Jurisdictional Determination (JD):				
	Preliminary JD - Based on available information, \( \subseteq \text{there appear to be (or)} \subseteq there appear to be no "waters of the United States" and/or "navigable waters of the United States" on the project site. A preliminary JD is not appealable (Reference 33 CFR part 331).			
$\boxtimes$	Approved JD – An approved JD is an a Check all that apply:	ppealable	action (Reference 33 CFR part 331).	
	There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area:			
	☑ <i>There are</i> "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: undetermined.			
			te waters or wetlands" within the reviewed area.  NCC/Migratory Bird Rule Information Sheet for Determination of No	
BASIS OF JURISDICTIONAL DETERMINATION:				
A. Waters defined under 33 CFR part 329 as "navigable waters of the United States":  The presence of waters that are subject to the ebb and flow of the tide and/or are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.				
B.	interstate or foreign commerce, including (2) The presence of interstate waters in (3) The presence of other waters such a sandflats, wetlands, sloughs, prairie por destruction of which could affect inters (i) which are or could be used by in (ii) from which fish or shellfish are	currently using all wat cluding in as intrastat tholes, we state commenterstate of e or could	ased, or were used in the past, or may be susceptible to use in the subject to the ebb and flow of the tide.  Attention territation with the subject to the ebb and flow of the tide.  Attention the tide that the tide tide that the tide tide that the tide tide tide that the tide tide tide tide tide tide tide tid	
	<ul><li>(4) Impoundments of waters otherwise</li><li>(5) The presence of a tributary to a wat</li><li>(6) The presence of territorial seas.</li></ul>	defined a er identifi		
Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional				

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination:

Ditch No. 19 is a tributary of a tributary of Little River Drainage District Ditch No. 1, a tributary of the Little River, a tributary of the St. Francis River, a navigable water of the U.S. Ditch No. 19 is a water of the U.S.; however, the project involves directional boring under the ditch and will not result in deposition into the ditch.

Lat	Ordinary High Water Mark indicated by:  Clear, natural line impressed on the bank  the presence of litter and debris  changes in the character of soil  destruction of terrestrial vegetation  shelving  other:  High Tide Line indicated by:  oil or scum line along shore objects  fine shell or debris deposits (foreshore)  physical markings/characteristics  tidal gages  other:
	Mean High Water Mark indicated by:  ☐ survey to available datum; ☐ physical markings; ☐ vegetation lines/changes in vegetation types.
	Wetland boundaries, as shown on the attached wetland delineation map and/or in a delineation report prepared by:
Bas	is For Not Asserting Jurisdiction:  The reviewed area consists entirely of uplands.  Unable to confirm the presence of waters in 33 CFR part 328(a)(1, 2, or 4-7).  Headquarters declined to approve jurisdiction on the basis of 33 CFR part 328.3(a)(3).  The Corps has made a case-specific determination that the following waters present on the site are not Waters of the United States:  Waste treatment systems, including treatment ponds or lagoons, pursuant to 33 CFR part 328.3.  Artificially irrigated areas, which would revert to upland if the irrigation ceased.  Artificial lakes and ponds created by excavating and/or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing.  Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating and/or diking dry land to retain water for primarily aesthetic reasons.  Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States found at 33 CFR 328.3(a).  Isolated, intrastate wetland with no nexus to interstate commerce.  Prior converted cropland, as determined by the Natural Resources Conservation Service. Explain rationale:  Non-tidal drainage or irrigation ditches excavated on dry land. Explain rationale:

<sup>&</sup>lt;sup>1</sup>Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

<sup>&</sup>lt;sup>2</sup>The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
